

Our Community Together: A Collective Impact on HIV in West Virginia

Thursday, March 26, 2020

DoubleTree by Hilton, Huntington, WV

Target Audience The intended audience for this conference are physicians, physician assistants, nurse practitioners, advance practice nurses, social work, ancillary team members and first responders. **For those not listed, please check with your licensing agency for credit approval.*

Conference description: This conference is designed for the community as one to address medical and first responder issues surrounding the HIV outbreaks that are currently impacting our residents and ourselves. Attendees will be provided the most recent information regarding HIV prevention to included impact of stigma, PrEP and nPEP, HIV case finding in the primary care setting and prevention in the setting of commercial sex work. This conference will also address burnout and mental health among first responders.

Objectives: *At the end of this program and depending which afternoon session attended (I* or II**), participants should be able to:*

1. Discuss current global, national, state HIV epidemiology, recognize transmission modes & stages of the disease process.
2. Discuss the 2016 Updated Guidelines for Antiretroviral Postexposure Prophylaxis after Sexual, Injection Drug Use, or Other Non-Occupational Exposure to HIV.
3. Identify the impact of stigma that can be placed on persons with HIV.
4. *Describe the burnout crisis among first responders and discuss solutions to address burnout.
5. *Discuss the guidelines for Prescribing Pre-Exposure Prophylaxis (PrEP) for HIV Prevention.
6. **List the harm reduction strategies aimed to decrease harm associated with drug use and related behaviors that increase the risk of HIV infection.
7. **Discuss HIV case finding and describe solutions to improve HIV testing uptake and case finding in the current setting of HIV epidemiology in West Virginia.
8. **Describe the concept of “Undetectable=Untransmittable” and discuss recent scientific developments for this HIV prevention model.
9. Identify factors associated with commercial sex work related to HIV risk and violence against sex workers.
