## Course Objectives

At the conclusion of this course, participants should be able to:

- Discuss new approaches being translated into identification, diagnosis, and treatment of select cancers
- Identify the utility and limitations of new therapeutic approaches for the treatment of cancers

## Lecture Objectives

### A.M. Objectives

- Describe some of the key elements for the successful delivery of cancer care and clinical trials while serving patients in a rural region
- Describe indications and outcomes for HAI/FUDR in the setting of unresectable colorectal hepatic metastases and intrahepatic cholangiocarcinoma
- Describe the clinical research activity across WVU CI Locations
- Describe the reasons behind the record number of medication shortages in the United States throughout 2023 and explain WVUH's strategy to mitigating the shortage's impact on oncology care

### P.M. Objectives

- Identify the unique challenges faced by young adults with cancer and what the WVUCI is planning to address these needs
- Identify all commercially available chimeric antigen receptor (CAR) T cell products and bi-specific antibodies; describe the indication, side effects and toxicities for each product; critically determine the best treatment option in real patient scenarios
- Discuss issues related to management of immune toxicities in oncology patients
